Because, you see, Blaze Pizza is a fast-food joint that produces incredibly delicious gourmet pizzas!

And in fact, traditional pizzerias should be trembling in their slippers because Blaze totally hit it out of the ball park in terms of quality pizza - and they can produce one from fresh to baked on your plate in a matter of 2-3 minutes!

And so another amazing franchise chain is set to conquer the world!

The secret is in their 180-second oven time... that's fast, that's really blazing!

And the results, I'm telling you, very impressive... you could serve me a Blaze Pizza as a prank at any top-notch, five-star pizzeria, and I really would not have been able to notice it out of place.

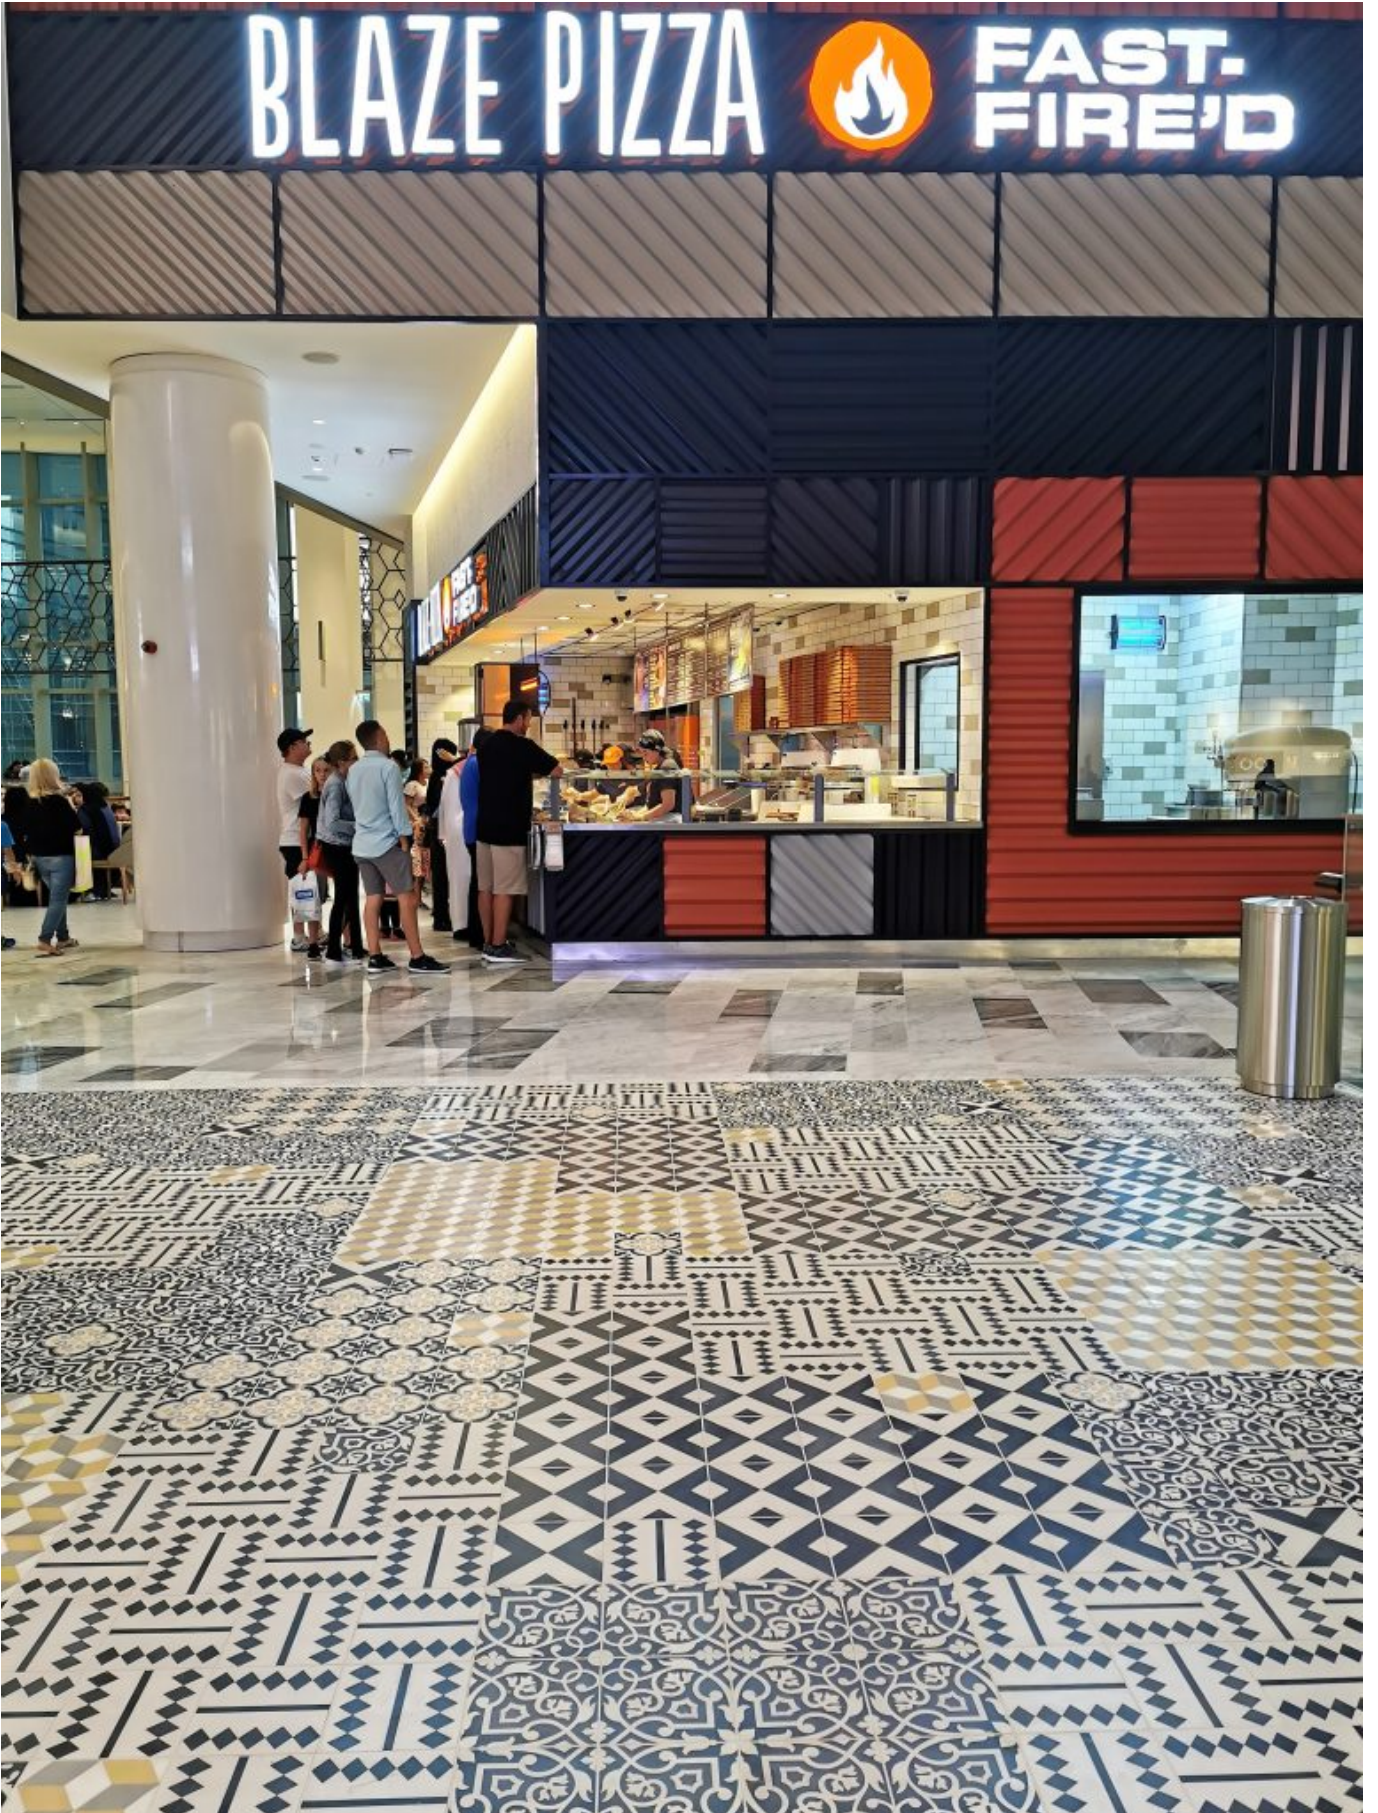

This is what you get:

But let's start from the larger picture...

The Galleria is Abu Dhabi's high-end mall, and it has recently completed an expansion - and there, up in the food court, you will find the Blaze Pizza outlet that I visited.

You start at one end, and you can order a set menu or build your own from well over 30 toppings - the staff work quick and right in front of you, starting with a fresh pizza dough.

At time of writing, you can choose from 4 different pizza doughs, 8 cheeses, 8 meats (including vegan options), 16 veggie toppings, and 7 finishing sauces!

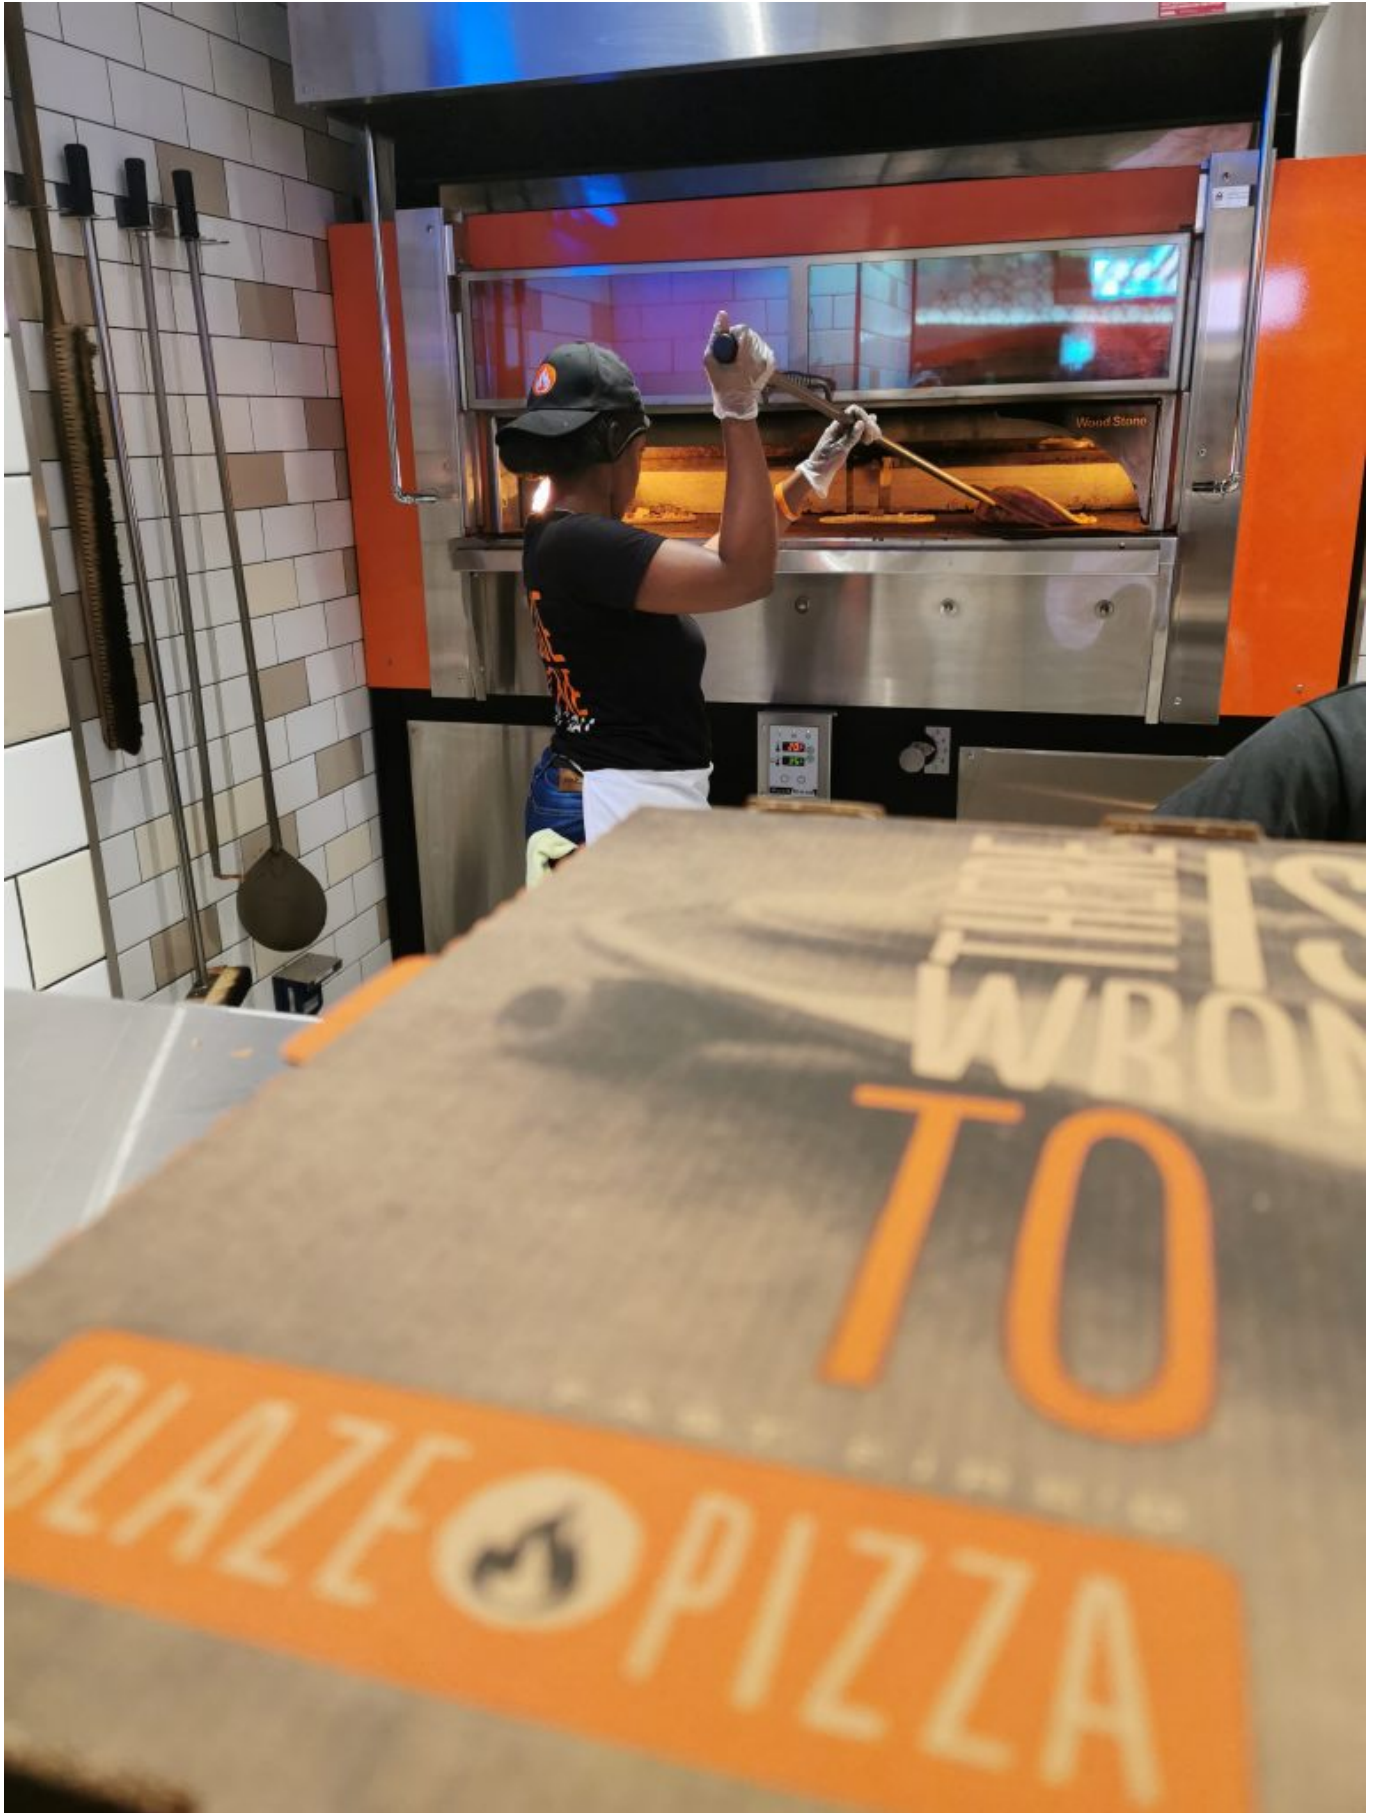

Besides the great selection and customization, the ingredients were fresh and well-seasoned.

And after building your pizza, it is passed to the oven - and what an oven! It's a furnace!

And the resulting pizza is a masterpiece!
